

# EXOTICS

*"I had over 80 Aoudads... that were taking over my high fenced land. They were very elusive and we explored using helicopters, darting and other methods to capture. I spoke with Kay at **Wireless Traps**, and I said there has to be something out there like the hog traps for exotics, and she shared with me the new trap they were working on. I had to purchase one and within days I had 55 Aoudads in the trap. I was so excited to get a picture of all of those animals in the trap. Imagine this, I'm 60 miles away from my trap and I was running around my house like a kid! I pushed one button to shut the gate and the photo button next. A picture confirmed that the doors were closed and all of the animals were caught. It felt like I had just experienced a hunt without compare. **Imagine***

*the thrill of being able to capture 55 Aoudads with an iPhone click from over 60 miles away? We were able to load all 55 on a trailer in less than 20 minutes and it was over."*

**David Boenker**, Wireless Traps Customer

## Revolutionize... How Exotics are Captured

Netting and Darting will soon be as archaic as a horse pulled plow. Trapping from your most comfortable chair, or even while vacationing in the islands is now possible. With Wireless Traps you feed and leave. Say goodbye to bugs and harsh weather while watching traps. Your cell phone receives pictures in real time when there is movement in your trap, and even takes pictures on demand. Once your target animals are in, simply press "Close Trap" on your smart phone App, and your gate closes with your exotics safely captured.

*David admires the 55 Aoudad he caught from his*

# WHAT DO YOU WANT TO CAPTURE?

## TESTIMONIALS

*"The best benefit of using the Wireless Traps' system is being able to setup in remote areas for controlling herd population. Without the system, it would be very hard and expensive to trap in these remote areas."*

**Josef Richarz,**  
Exotic Game Control

*"Since Morani River Ranch has started using Wireless Trap Systems, we have been very successful. We have seen several species in the trap including Pere David's deer, Addax, Nile Lechwe, Nubian Ibex, Transcaspian Urial, Markhor, and many more! The routine nature of the trap allows all breeds to become comfortable with its presence. After just a few traps the system has paid for itself!"*

**Cole L. Reid,** Operations  
Manager at Morani River Ranch

# WHERE DO YOU WANT TO TRAP?

## EXOTIC WIRELESS TRAP SYSTEMS

- HD camera
- Cellular modem
- SIM card
- Motion sensor
- Dual external infrared lights
- Solar panel, charger & bracket
- Steel battery box (battery not included)
- Gate lock with extension cable

## PROUD MEMBER OF...

## OPTIONAL ACCESSORIES

- Directional Antenna
- Corrals.....NEW!
- Gates
- Kit for two gates
- Lock Frame

# ASG

## EXOTIC CORRAL TRAP

- Approximately 60' Diameter Corral
- Two Guillotine Gates
- Black Wall Panels 8' Tall & 16' Wide
- No Tools Required
- Walk Door & Shot Window
